## Display registration details

```python
#data disply
def viewdatas(request):
    vdata=docreg.objects.all()
    return render(request, template_name: 'view.html', context: {"cdata":vdata})
```

View.html

```html
{% extends 'base.html' %}
{% load static %}
{% block hai %}
{% for i in cdata %}
<hr>
<div class="mx-auto w-50 bg-success text-center text-white p-3 border-warning rounded">
<div class="card text-center " style="...">
  <ul class="list-group list-group-flush bg-success text-center">
    <li class="list-group-item">{{i.name1}}</li>
    <li class="list-group-item">{{i.email1}}</li>
    <li class="list-group-item">{{i.ph}}</li>
      <li class="list-group-item">{{i.msg}}</li>
  </ul>
<hr>
</div>
</div>

{% endfor %}
{% endblock %}
```

Urls.py

```python
    path('view/',views.viewdatas),
```
